## NEW FRAGMENTS OF THE BUDDHANĀMASŪTRA

Two complete folios of a manuscript of the Buddhanāmasūtra have already been edited by A.F.R. Hoernle<sup>1</sup> who, however, could not identify them. In 1984 G.M.Bongard-Levin and M.I.Vorob'ëva-Desyatovskaja<sup>2</sup> edited four fragments of the manuscript SI P/70 from the Petrovsky collection (St. Petersburg). In 1987<sup>3</sup> these fragments

<sup>1</sup> "Three further Collections of Ancient Manuscripts from Central Asia", in JASB, 1897, pp. 231-233. They belong to the Godfrey manuscripts and are described on p. 227: "The first set consists of long oblong leaves measuring 11x2 1/2 inches. Two of these leaves are shown on Plates VIII and IX. There is a third leaf of this set which is nearly perfect. Besides, there are two small fragments. The total is five pieces of manuscript...." The find-spot is given on p. 226 according to a letter of S.H. Godfrey as "near some old buried city in the vicinity of Kuchar". A.F.R. Hoernle ("A Report on the British Collection of Antiquities from Central Asia. Part II", in JASB, *Extra-Number* 1 (1901), 1902, p. 17 [no. 3]) corrected himself: "Described (not quite correctly) and figured in [...]. A mere fragment of the book, only two complete leaves, and two small pieces of a third, surviving." On pp. 17 and 31 he supposed that the manuscript was found at Dandān-uiliq. I could trace these fragments in the British Library (Oriental and India Office Collections), London. They are put between panes of glass with the signature Brit. Mus. Or. 6403 B (1). The first leaf is folio 9 (with the sigle G 7), the second leaf is folio 11 (with the sigle G 1), and the two fragments (without sigle) are parts of folio 10.

could be identified as belonging to the "Buddhanāmasūtra" and were edited again together with the fragment SI L/2 from the Lavrov collection (St. Petersburg), which was supposed to belong to the same manuscript. The Buddhanāmasūtra has been translated into Tibetan with the title "*Saṇis rgyas kyi mtshan lta stoṇ bži brgya lta bcu rtsa gsum pa*" (Buddhanāmasahasrapañcaśatacaturtripañcadaśa)<sup>4</sup> and into Chinese with the title "Wǔqianwǔbāi fómíng shénhzhòu chīnzhàng miezùi jīng"<sup>5</sup>. O. von Hinüber<sup>6</sup> has dealt again with the fragments SI P/70, SI L/2 and Godfrey fol. II. In his opinion the fragment SI L/2, which has no counterpart in the Tibetan translation, does not belong to the manuscript SI P/70. He refers to a list of Tathāgata names in the *Gaṇḍavyūhasūtra* (Gv 256.6-259.19), in which almost all the names of the Sanskrit Buddhanāmasūtra occur. The fragments SI P/70 and SI L/2 have been edited again in 1990 (BB 34, pp. 278-292) together with some new fragments of the Petrovsky collection: SI P/60 (one fragment), SI P/61 (three fragments), and SI P/71a (one fragment). On the basis of this publication O. von Hinüber<sup>7</sup> reconstructed the Sanskrit text of the Buddhanāmasūtra as far as the folios in the Petrovsky collection and in the Hoernle collection were concerned. In 1994 I was able to trace the two fragments of folio 10 of the Godfrey MS., mentioned in note 1 above, and to identify the fragment Hoernle 143 S.A. 14 (S.A<sup>IV</sup> 4) as belonging to the Buddhanāmasūtra<sup>8</sup>.

Recently I came across some new fragments of the Buddhanāmasūtra. They belong to the following collections:

Stein<sup>9</sup>: D. iv.3; Kha. i.204; Kha. i.316; Kha. vi.3

Hoernle: without no. (SH 162)<sup>10</sup>; G7 [Or. 6403 B (3)]

Crosby<sup>11</sup>: 109/108 + 29/28 + 271/270; 84/85 + 171/170; 50/51 + 220/221

Petrovsky<sup>12</sup>: S1 P/116<sub>e1</sub>; S1 P/116<sub>e2</sub>; S1 P/116m

The main results of the new fragments edited here are as follows: 1. Some hitherto unknown parts of the Sanskrit text of the Buddhanāmasūtra can be recovered. 2. The find-spot of the fragment SI P/60 of the Petrovsky collection as well as the fragment Crosby 84/85 + 170/171 of the Crosby collection can be determined by

SUNDERMANN, INGRID WARNKE and PETER ZIEME, Berlin, 1996 (Berichte und Abhandlungen, Sonderband I), pp. 392-396. In this context the fragment Hoernle 143 S.A. 8 was also edited, which, similar to the fragment SI L/2, contains Tathāgata names with *dhāraṇīs*. The textual portions of both fragments, however, have no counterpart in the Tibetan or Chinese translation of the Buddhanāmasūtra.

<sup>9</sup> The transliteration of the Stein and Hoernle fragments given below is based mainly on microfilms of the British Museum and the British Library (Oriental and India Office Collections), London, kept in the Seminar für Indologie und Buddhismuskunde, University of Göttingen.

<sup>10</sup> Already identified in J.-U. HARTMANN and K. WILLE, "Die nordturkistanischen Sanskrit-Handschriften der Sammlung Hoernle (Funde buddhistischer Sanskrit-Handschriften, II)", in *Sanskrit-Texte aus dem buddhistischen Kanon: Neuentdeckungen und Neueditionen II*, Göttingen, 1992 (Sanskrit-Wörterbuch der buddhistischen Texte aus den Turfan-Funden, Beiheft 4), pp. 34 [Photo 162].

<sup>11</sup> About this collection housed in the Library of Congress (Washington, D.C.) see R.E. EMMERICK, "The Crosby Collection", in *Proceedings of the XXXII International Congress for Asian and North African Studies, Hamburg 25th-30th August 1986* (ZDMG-Suppl. 9), ed. A. WEZLER and E. HAMMERSCHMIDT, Stuttgart, 1992, pp. 672-674; *dto.*, "Notes on the Crosby Collection", in *Medioiranica, Proceedings of the International Colloquium organized by the Katholieke Universiteit Leuven from the 21st to the 23rd of May 1990*, ed. W. SKALMOWSKI and A. van TONGERLOO, Leuven, 1993, pp. 57-64. On p. 672 and p. 57 respectively he refers to several fragments belonging to a manuscript containing many Buddha names. The transliteration of the fragments given below is based on photos which Professor EMMERICK kindly entrusted to my care for edition.

<sup>12</sup> In the description of the fragments (BB 34, p. 283, no. 4) four fragments are listed (SI P/71 a, SI P/116e, SI /116m). Only the largest fragment SI P/71 a has been edited yet. I made a transliteration of the remaining three fragments given below during a four day stay in St. Petersburg in 1996.

discovering a missing part of the corresponding folio in the Stein collection. 3. Altogether there are parts of at least 8 manuscripts of the Buddhanāmasūtra extant:

- a. SI P/70
- b. SI P/61, Hoernle G I [Or. 6403B(1); Godfrey-MS.]<sup>13</sup>
- c. SI P/60 + Stein D.iv.3 + Hoernle G7 [Or. 6403B(3); Godfrey-MS.]<sup>14</sup>
- d. SI P/71a
- e. Hoernle 143 S.A. 14 (S.A.<sup>IV</sup>)<sup>15</sup>
- f. Crosby 109/108 + 29/28 + 271/270<sup>16</sup>
- g. Crosby 84/85 + 170/171 + Stein Kha.vi.3, Crosby 50/51 + 220/221
- h. Stein Kha. i.316

At the moment the remaining five fragments cannot be assigned definitely to one of these eight MSS. The script of all fragments edited here is a variant on the Southern Turkestan Brāhmī<sup>17</sup>.

<sup>13</sup> Cf. K. WILLE, *op. cit.*, p. 393: fol. no. (1) or (2) (SI P/61, fragm. 7), 5 (SI P/61, fragm. 6), (7) (SI P/61, fragm. 8), 9-11 (Godfrey MS.); O. von HINÜBER, "Dharanis aus Zentralasien", p. 171 restored the missing foliation numbers of SI P/61 as follows: (1), 5, (8).

<sup>14</sup> O. v. HINÜBER (*Ibid*) has shown convincingly that the folios Hoernle G I [signature Or. 6403B(1); Godfrey MS.] do not belong to the same manuscript as SI P/60 as was postulated in BB 34, p. 279.

<sup>15</sup> Edited as SHT 4392 in K. WILLE, *op. cit.*, pp. 394 f.

<sup>16</sup> Looked at from the paleographical point of view (i.e. ruling, difference between the *akṣaras* *ma*, *bha*, and the vowel sign *e*) the fragments of Crosby 109/108 ff. and Crosby 84/85 ff. belong to different manuscripts.

#### Fragment 4 a. Stein D. iv.3 (CA.) [signature Or. 8212.40]

The fragment was excavated in Dandān-uiliq at shrine D. iv during the first expedition of M.A. Stein and is the missing right part of the folio SI P/60<sup>24</sup>. He stayed in Dandān-uiliq from the 18th of December 1900 till the 4th of January 1901. For a description of the fragment see Ancient Khotan I, p. 295: "D. iv.3. MS. on paper; Brahmi; No. 22. One small fragment from lower right corner of leaf. - Note ix. No. 22 [by Dr. Hoernle:] Belongs to a leaf of another MS. than the preceding; for paper and script differ. Language: Sanskrit.

<sup>25</sup> There are 9 fragments with the signature Or. 6403 B (3). 8 fragments belong to a manuscript of the Sumukhadhāraṇī. The fragment at hand is the ninth fragment, fixed together with the fragment of folio (5) of the Sumukhadhāraṇī MS., supposing that they belong to one folio. Cf. K. WILLE, *op. cit.*, note 36. During a short stay in London in 1995 I could take the measurement: 2.4x5 cm (height x length).

### Fragment 7: Crosby 84/85 + 171/170 (italics) + Stein Kha.vi.3 (bold)

The find-spot of the Stein fragment Kha.vi.3 [signature SS 71] is Khādaliq, excavated from minor ruins during the second expedition of M.A. Stein. For a description of the Stein fragment see Serindia III<sup>31</sup>: "Kha.vi.3. 13 small, or minute, frs. of 7 Pōthīs in Skr. and Upright Gupta. [...] No. 451, Hoernle Reg.<sup>32</sup>" O.T.Crosby

<sup>30</sup> O. v. HINÜBER, "Nochmals zu Dhāraṇīs aus Zentralasien", p. 167, Blatt 25b5.

<sup>31</sup> M.A. STEIN, *op. cit.*, Vol. III, p. 1440.

<sup>32</sup> During a short stay in London in 1995 I could take the measurement of this fragment: 5.2 x 4.4 cm (height x length).

bought the fragmentary manuscripts in Khotan in 1903. By identifying the small fragment of the Stein collection as belonging to the same folio as the Crosby fragment 84 f. we know now the find-spot of this manuscript in the Crosby collection, too. Fragment 8 below is the next folio of the same manuscript.

*Parallels:* Peking, fol. 34b2-5; Derge [Taipei], fol. 31b3-5; SI P/61, fragm. 8al-5 (ed. BB 34, p. 288); fragm. 6v3-5 above.
